

Biological Control of Weeds Recovery Sheet

(Please refer to the back of this sheet for instructions)

Site name:

Organisation:

Observer(s):

Date:

Time of day:

Current weather conditions

- 1) Sunny / Partly / Overcast / Rain
- 2) Strong wind / Light wind / Calm
- 3) Temperature (°C) < 10 / 10-15 / 15 -20/ 20 -25 / >25

**Old Man's Beard
Sawfly**

Insect information

- 4) Number of: Adults: _____ Larvae: _____
- 5) Frass seen: Yes / No
- 6) Overall damage to foliage: None / Occasional / Patchy / Heavy / Severe
- 7) Furthest distance insect found from release point (m):
None Found / <20 / 20-50 / 50-100 / 100-300 / 300-500 / Further?
- 8) Time spent searching (mins): _____

Weed Information

- 9) Most obvious life stage: New Leafy Growth / Flowers / Seeding
- 10) Old Man's Beard type at the release point: Isolated Bushes / Clumps / Block
- 11) Infestation: Major (as far as eye can see) / Moderate (>100m²) / Minor (<100m²)
- 12) Photos taken: Yes / No
- 13) Photo compass bearing: _____
- 14) GPS for photopoint: _____
- 15) Photo file name: _____

Comments

- 16) Have any of the following happened to the site recently?
Mowing / Spraying / Grazing / Flood / Drought / Fire / Other?
- 17) Please use the back of this sheet to record any further observations or comments about the site,
including any checks for non-target damage.

INSTRUCTIONS FOR FILLING OUT THIS SHEET

(Please note that it is important to complete these questions in order)

Where choices are given mark the correct answer by bolding or highlighting it or by deleting the other options.

- **Site Name** – please be consistent in the use of site names to prevent confusion.
- **Organisation** – the name of your organisation.
- **Observer(s)** – the names of people who helped with this recovery not onlookers.

Current Weather Conditions

1-3) Choose the words that best describe the weather conditions.

Insect information

- 4) Spend 10 minutes looking at all the plants within a 5 m radius of the release point. Record how many adults and larvae you can find. Look for a small fly with a red or orange body and white caterpillar-like larvae with a black head.
- 5) Record if you can find balls of frass, associated with feeding damage.
- 6) Record the amount of feeding damage seen overall at the site: occasional (signs of damage present but not common), patchy (signs of damage are present but are variable throughout the site, some plants may have no damage, and others may have heavy damage but this would be rare), heavy (the majority of plants are showing signs of damage and at least some plants are beginning to show signs of severe defoliation/damage or stress), and severe (severe damage is obvious and widespread).
- 7) If you have time to look further afield we would like to know how far away from the release point you can find adults or larvae.
- 8) Record how long you spent actively searching.

Weed Information

- 9) Record the most obvious life stage.
- 10) Record the type of Old Man's Beard growing at the release point.
- 11) Estimate and record the approximate size of the infestation using the categories provided.
- 12) Please indicate if you have taken photos.
- 13-15) If you have taken photos please record the photo compass bearing, the GPS point, the file name for the photo and attach hard copies to this form if you can.

Comments

- 16) Please indicate if any of these important events have happened to the site.
- 17) Tell us any other important information we should know about the site (e.g. whether you have been harvesting for release at new sites). Use the top of this page if you need extra space.
