Rural Decision Makers SUR✓EY2015

LANDCARE RESEARCH
MANAAKI WHENUA

Landcare Research

- Provides research and advice for organisations that develop and implement policies for land and water
- Integrates economic, social, & environmental data across industries and land uses
- Builds a better picture of decision making to shape New Zealand's future

Rural Decision Makers SUR✓EY2015

- Developed in winter 2013 to inform agent-based models of land use in 3 regions
- Usefulness extends beyond models
 - Evidence base
 - Facilitates complex data analysis
 - Evaluate questions of interest to government, industry, and researchers
- Extended to 16 regions
- Conducted in winter 2015
 - To be conducted every 2 years

Questionnaire

- Refinement of 2013 Survey of Rural Decision Makers
- Questionnaire design
 - Central government: MPI and MfE
 - Regional councils
 - Industry/sector groups – Federated Farmers, Dairy NZ, Beef + Lamb NZ, Horticulture NZ, QEII Charitable Trust
 - 40+ scientists from CRIs, research groups
 - Faculty/students from NZ, Australia, UK, US, France
- Federated Farmers focus group

Questionnaire

- Ownership and structure
- Land use, land-use change
- Livestock
- Forestry practice
- Water and irrigation
- Land management
- Technology adoption
- Climate
- Vertebrate, plant pests
- Networks, farming support
- Values, norms, preferences
- Farming objectives, profits
- Labour
- Demographics, education
- Community participation
- Opportunities, challenges
- Future planning

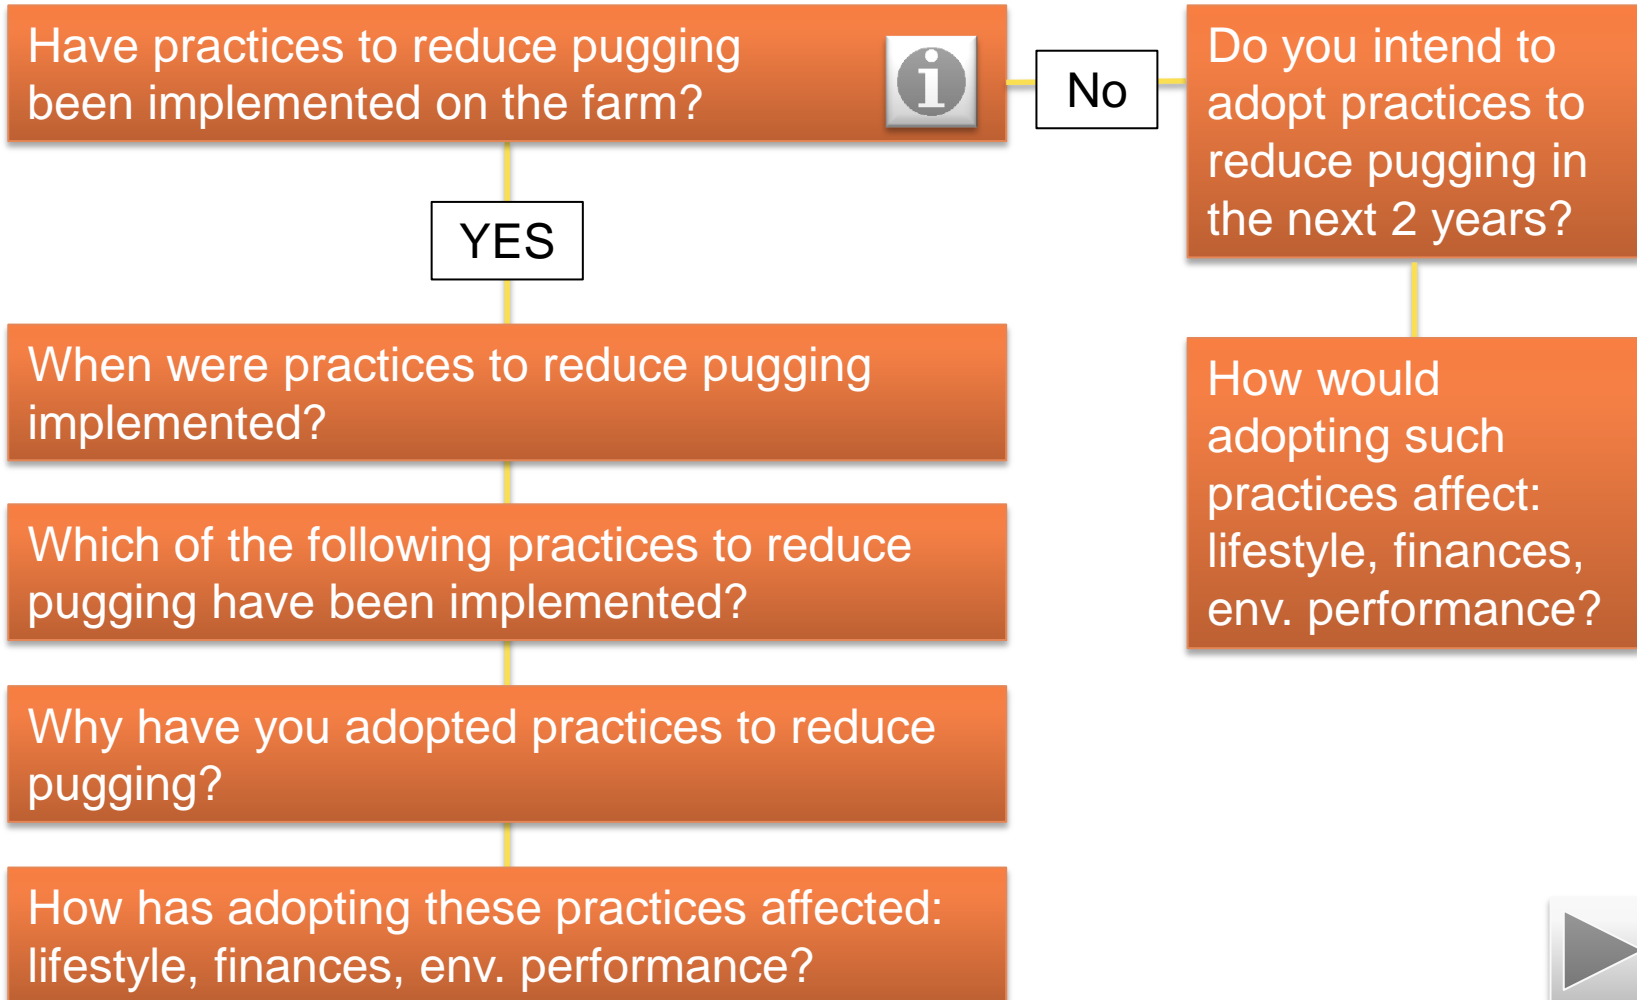

288 questions

On-line Delivery

- Disadvantage:
lower response rates
- Advantages:
lower cost,
no data entry error,
complex logic

Complex Logic

Complex Logic

Show when: (((Question "Which of the following land uses apply to the land that you farm in [question("option value"), id="171", option="10298"] ([question("option value"), id="171", option="10297"]) during the previous 12 months? Tick all that apply." #15 is one of the following answers ("Grazing livestock that are NOT OWNED by the farming business (e.g. **dairy support**),"Farming **sheep and/or beef**","Raising and/or finishing **prime cattle**, including bull beef","Operating a **dairy platform**","Operating a **dairy run off**","Raising **deer**","Raising **pigs**") OR Question "Which of the following land uses apply to the land that you farm in [question("option value"), id="187", option="10383"] ([question("option value"), id="187", option="10382"]) during the previous 12 months? Tick all that apply." #21 is one of the following answers ("Grazing livestock that are NOT OWNED by the farming business (e.g. **dairy support**),"Farming **sheep and/or beef**","Raising and/or finishing **prime cattle**, including bull beef","Operating a **dairy platform**","Operating a **dairy run off**","Raising **deer**","Raising **pigs**") OR Question "Among the [question("value"), id="260"] hectares located elsewhere in New Zealand [apart from [question("option value"), id="171", option="10298"] ([question("option value"), id="171", option="10297"]) and [question("option value"), id="187", option="10383"] ([question("option value"), id="187", option="10382"])], which of the following land uses apply during the previous 12 months? Tick all that apply." #27 is one of the following answers ("Grazing livestock that are NOT OWNED by the farming business (e.g. **dairy support**),"Farming **sheep and/or beef**","Raising and/or finishing **prime cattle**, including bull beef","Operating a **dairy platform**","Operating a **dairy run off**","Raising **deer**","Raising **pigs**") AND Question "How prone to pugging is your pasture?" #38 is one of the following answers ("**Not very prone**","**Prone**","**Very prone**") AND Which situation applies to your land? " is one of the following answers ("**Commercial farming** (in which the primary purpose is selling farm outputs)"))

Survey Sample

- 2013 respondents (permission to re-contact)
- Statistics New Zealand
- NAIT
- Industry / sector groups
 - Federated Farmers
 - Beef + Lamb NZ
 - QEII Charitable Trust
 - Rural Women
 - Horticulture NZ
 - NZWine
 - Farm Forestry Association
 - Foundation for Arable Research

E-mail contact is critical
Personalised emails are best
Reminders are very effective

Survey Sample

- Survey results shared with respondents
- \$10 donation to charity

- Prize draw for one of 5 Prezzy® cards

Survey Sample

SRDM 2015

- 288 questions (commercial)
- 3,264 responses
2,849 complete
- Average completion time =
27 minutes

SRDM 2013

- 192 questions
- 2000+ responses
1,564 complete
- Average completion time =
25 minutes

Survey Sample

- Sheep & beef = 49.9%
- Dairy = 21.7%
- Dairy grazing = 5.9%
- Fruit/nuts = 5.0%
- Arable = 3.2%
- Forestry = 3.1%
- Kiwifruit = 2.5%
- Other stock = 2.4%
- Derr = 2.3%
- Wine grapes = 2.2%
- Veg/flowers = 2.0%

Survey Sample

North Island

- Northland = 8.6%
- Auckland = 7.4%
- Waikato = 13.8%
- Bay of Plenty = 7.0%
- Gisborne = 1.8%
- Hawke's Bay = 6.2%
- Manawatu-Wanganui = 10.0%
- Taranaki = 4.6%
- Wellington = 5.9%

South Island

- Tasman/Nelson = 3.6%
- Marlborough = 2.4%
- West Coast = 1.6%
- Canterbury = 14.6%
- Otago = 7.2%
- Southland = 5.4%

2. Bar Charts
3. Histograms

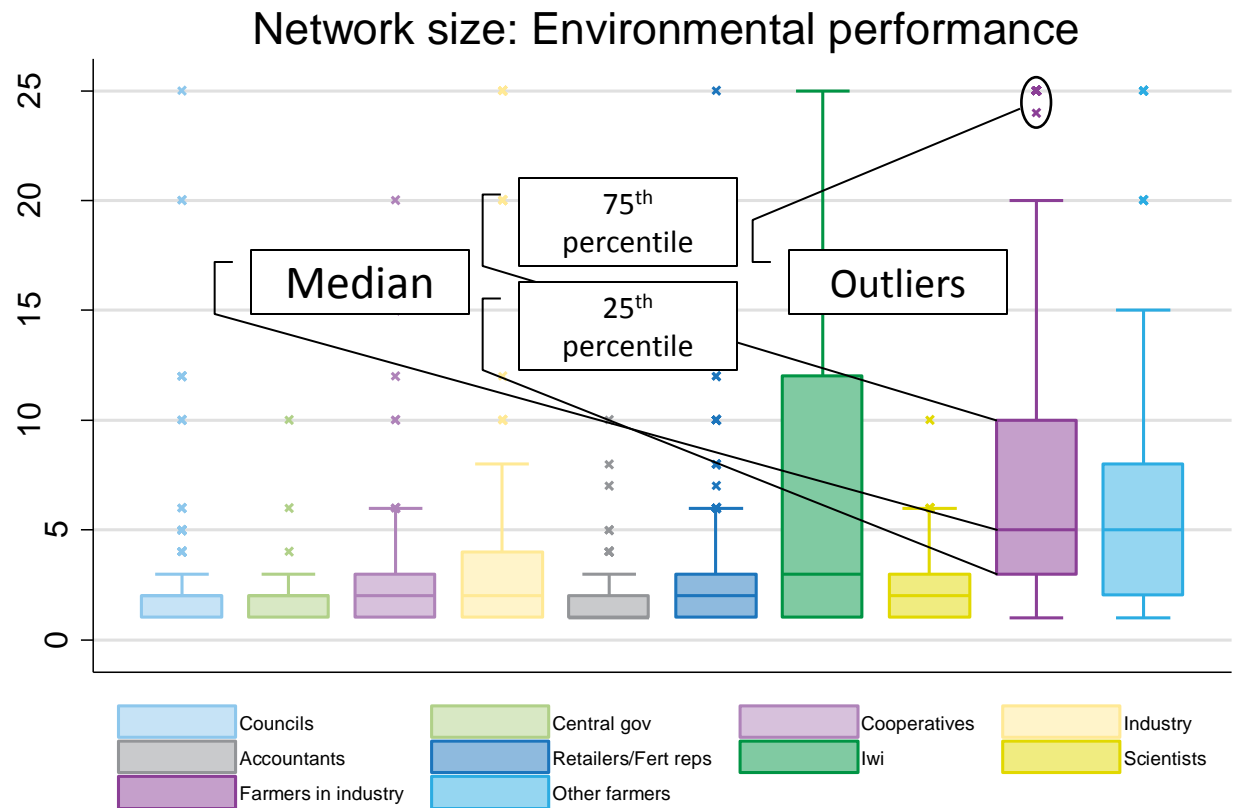

1. This figure shows responses to the question "Are you fully prepared to take risks?"...
2. ... among dairy farmers who responded to the survey.
3. Notes help to interpret answers. 0 means "don't like to take risks" while 10 means "fully prepared to take risks".
4. The *x-axis* shows the range different answers: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10.
5. ... and the *y-axis* shows the share of respondents who gave each response.
Thus, about 5% of the dairy farmers in the survey responded "3" to the question "Are you fully prepared to take risks?"
6. The *normal distribution curve* highlights the average: The peak of the curve is about 5.9, indicating that...
... The average response among dairy farmers in the survey is 5.9.

Current Research

- Who are the risk-taking innovators? Who are in their professional networks?
- Developing typologies to predict adoption and timing of good management practices
- How does ownership structure influence environmental practice?
- Where do farmers winter off stock?

Current Research

- How does proximity to the conservation estate influence farmer values and management?
- Which practices for managing soil are complements? Which are substitutes?
- How does belief about future climate affect current practice?
- Understanding future land use through agent-based models
- How does age affect on-farm decision making?

Data Exploration

- **Water use and irrigation**
- **Stock exclusion**
- **Age and decision making**

Water Use and Irrigation

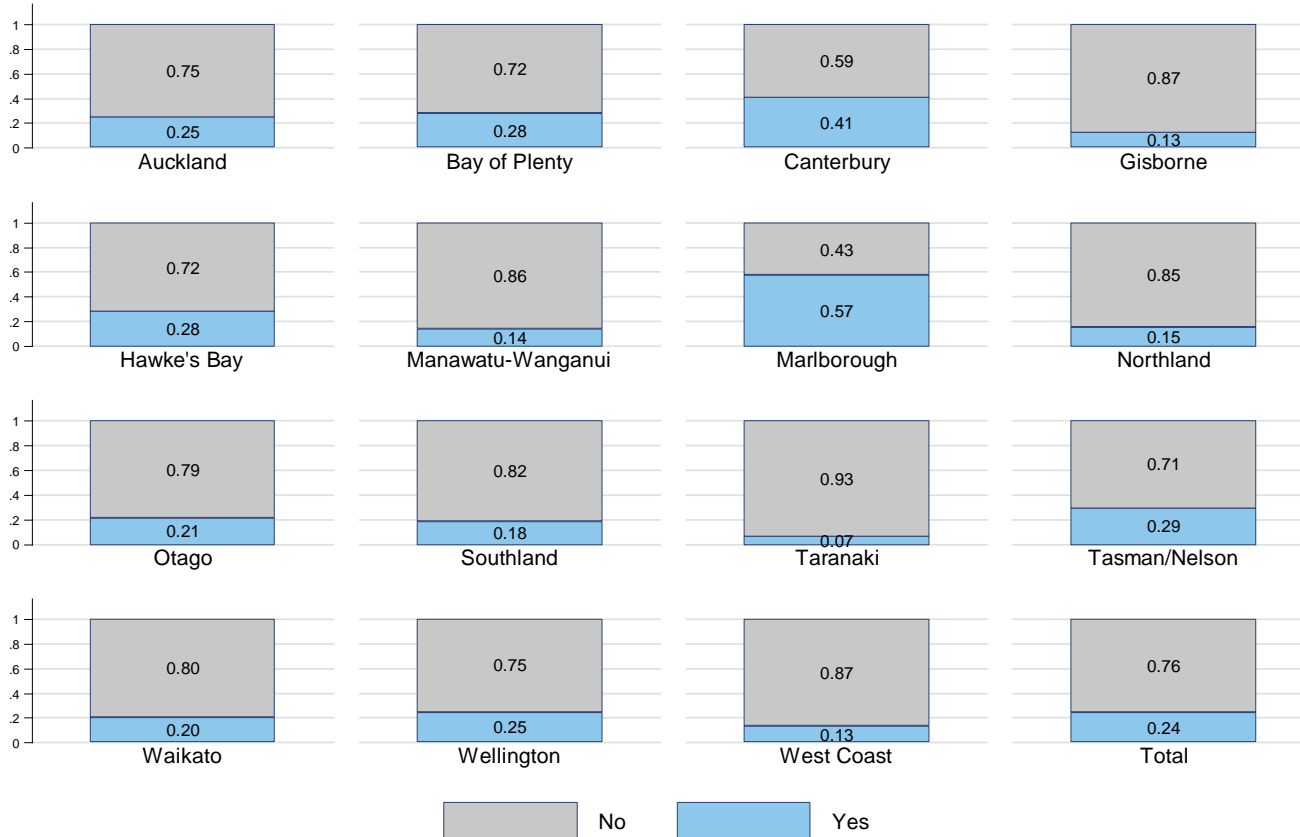

Do you have a consent for taking water?

Total shows the unweighted distribution.

Water Use and Irrigation

Do you have a consent for taking water?

Total shows the unweighted distribution.

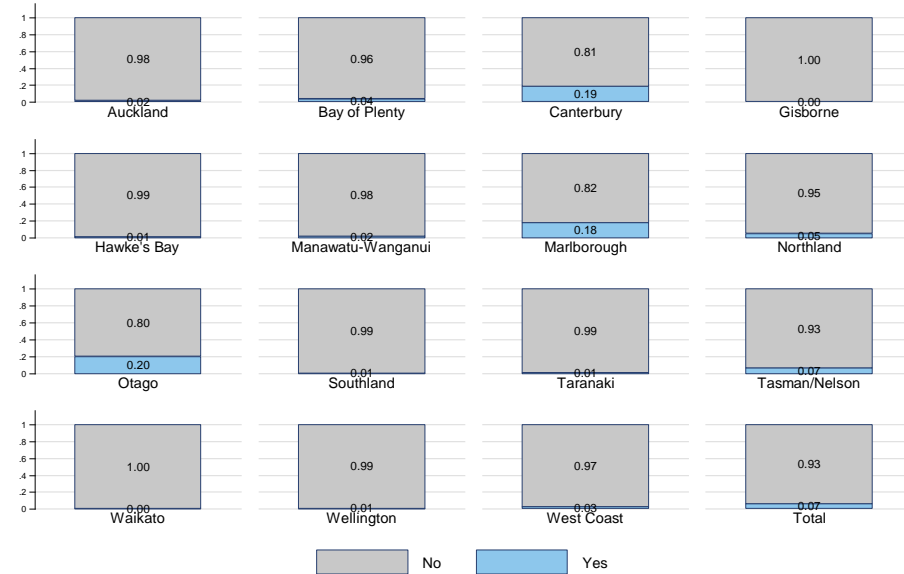

Water Use and Irrigation

Do you participate in an irrigation scheme?

Total shows the unweighted distribution.

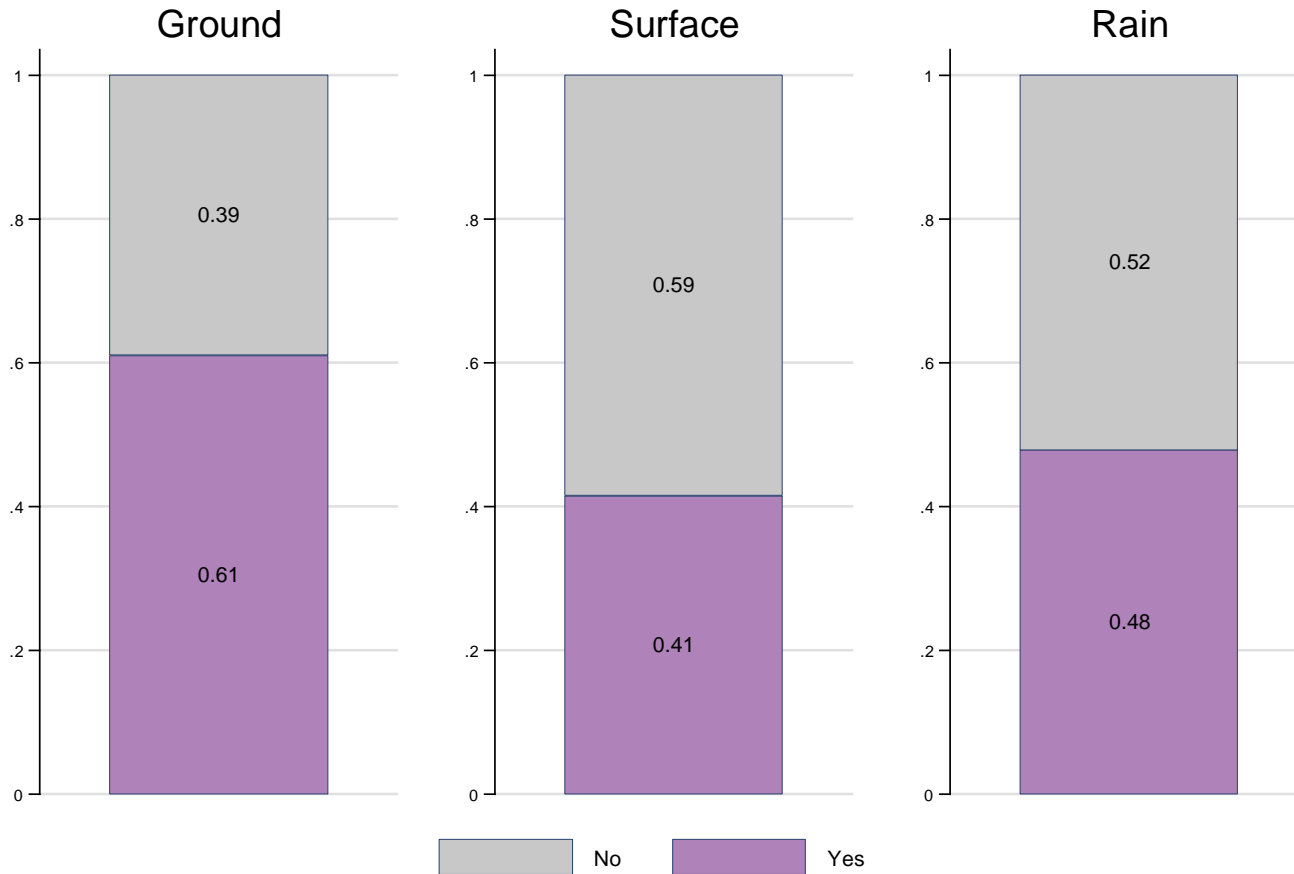

Do you participate in an irrigation scheme?

Total shows the unweighted distribution.

Water Use and Irrigation

Sources of water

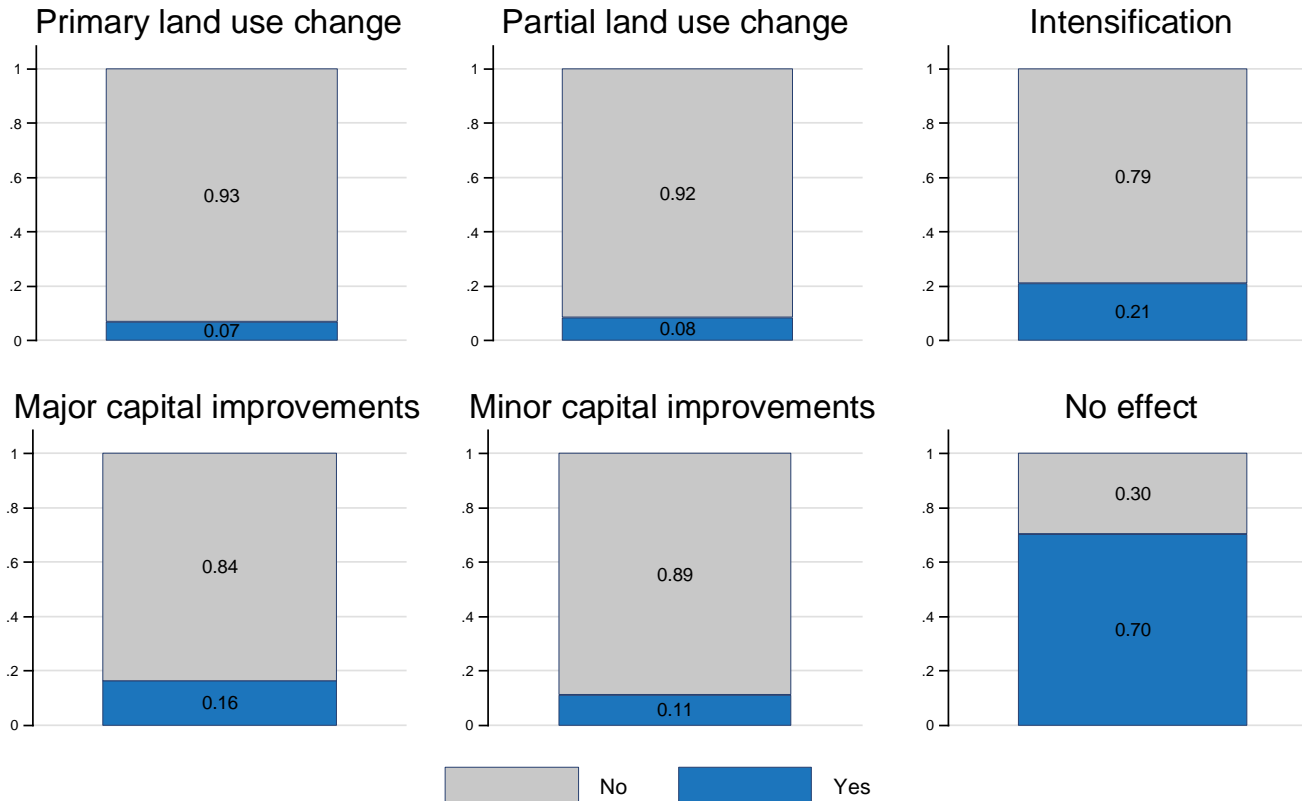

Water Use and Irrigation

Reliability of the water supply for the farm business

Water Use and Irrigation

Has uncertainty about water consents prevented changes to the farm business?

Conditional on having a consent and/or participating in an irrigation scheme.

Water Use and Irrigation

Expectation that consent for taking water will be renewed

Renewed at higher level

Renewed at same level

Renewed at lower level

Not renewed

Conditional on having a consent and/or participating in an irrigation scheme.

Water Use and Irrigation

Should transfers of water permits be allowed?

Temporary

Permanent

Yes No Uncertain

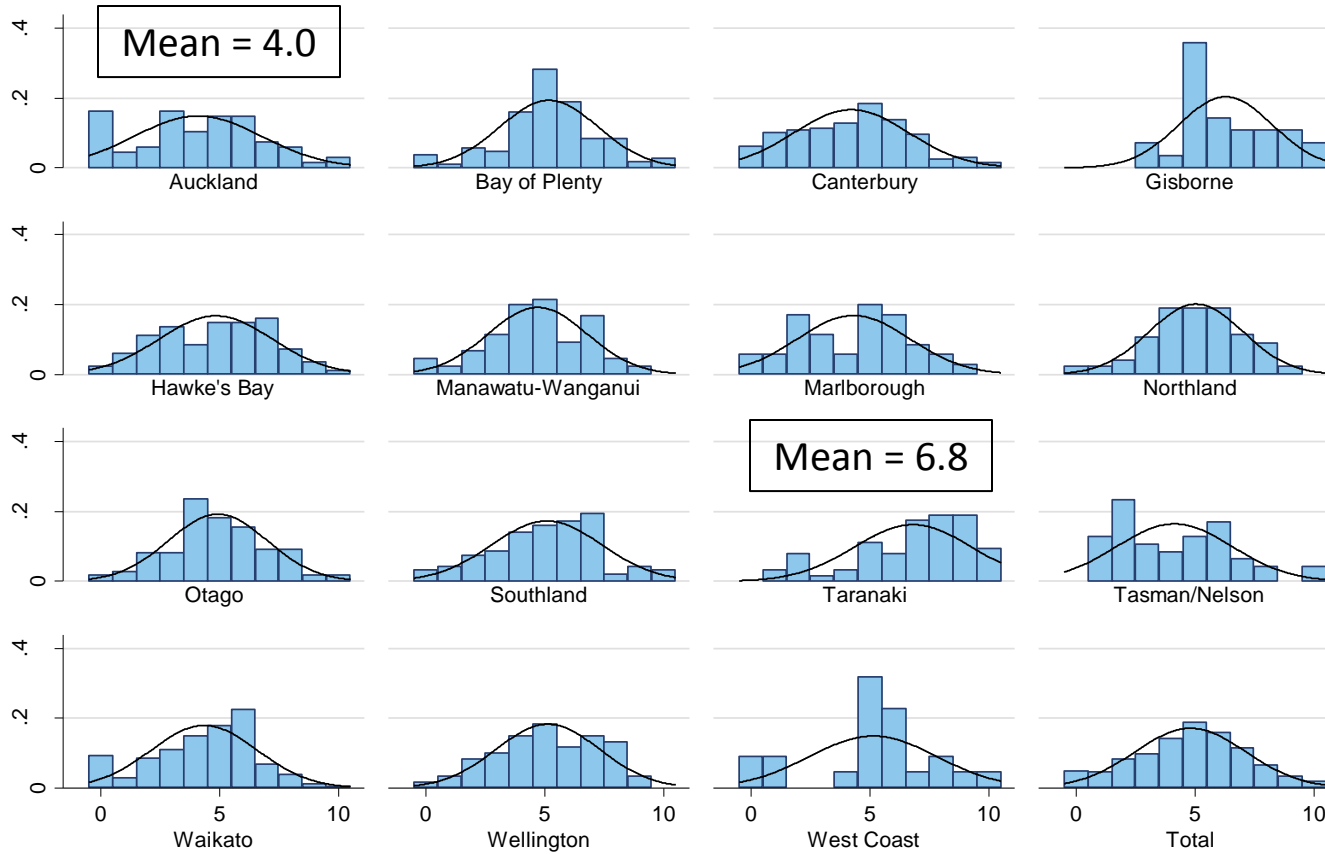

Water Use and Irrigation

Has your farm transferred a water permit in the past?

Water Use and Irrigation

Council's effectiveness at managing water resources

0 = not at all effective ... 10 = extremely effective. Total shows the unweighted distribution.

Data Exploration

- Water use and irrigation
- **Stock exclusion**
- Age and decision making

Stock Exclusion

Large streams are fenced

Among respondents with livestock.

Stock Exclusion

Percent of large streams fenced

Among respondents with fenced streams. Total shows the unweighted distribution.

Stock Exclusion

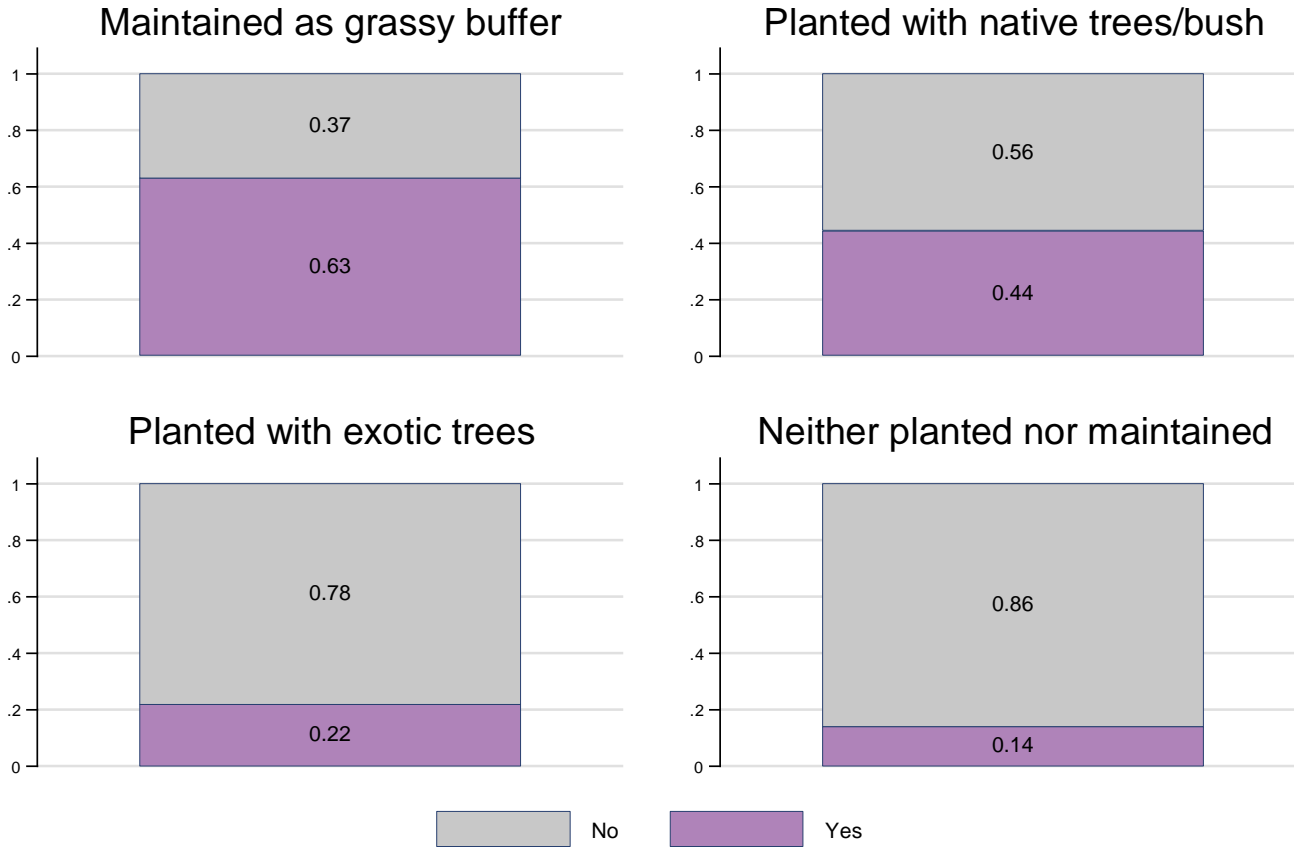

When were waterways on your farm first fenced?

Conditional on having fenced streams. Total is unweighted average.

Stock Exclusion

Description of fenced waterways

Among respondents with fenced streams.

Stock Exclusion

Reasons for fencing large streams

Among respondents who fence large streams. * indicates common response recorded in 'other' category.

Stock Exclusion

Effect of fencing large streams

Finances

Environment

Lifestyle

Among respondents who fence large streams.

Stock Exclusion

Reasons for not fencing large streams

Among respondents who do not fence large streams. * indicates common response recorded in 'other' category.

Stock Exclusion

Effect of fencing large streams
among those who have not done so

Finances

Environment

Lifestyle

Lower / worse No change Higher / better

Among respondents who do not fence large streams.

Stock Exclusion

Intend to fence large waterways in next 2 years

Conditional on having livestock and unfenced streams. Activities with few observations omitted. Total is unweighted average.

Data Exploration

A photograph of two men standing in front of a corrugated metal building. The man on the left is older, with dark hair, wearing a brown leather vest over a light blue shirt, with his arms crossed and a wide smile. The man on the right is younger, with short brown hair, wearing a blue and white plaid shirt over a white t-shirt, with his hands in his pockets and a slight smile. The background shows the corrugated metal wall and a window with a wooden frame. The lighting suggests it's either early morning or late afternoon.

Age and decision making

- Values
 - Willing to take risks
 - Prefers leaving experimenting to others
- Practice
 - Has adopted novel technologies
- Objectives
 - Prioritize financial performance
 - Prioritize environmental performance
- Future plans
 - Sell, subdivide, or lease
 - Intensify
 - Convert

Econometric analysis to control for gender, education, industry, region

Age and decision making

- In general, how willing are you to take risks?

0 = do not like to take risks ... 10 = fully prepared to take risks

- I prefer leaving experimenting with new ideas to others.

0 = strongly disagree ... 10 = strongly agree

Age and decision making

	Willing to take risks	Prefer others to experiment
ages 40-49	-0.560*** (-2.88)	0.180 (0.83)
ages 50-59	-0.517*** (-2.85)	0.0903 (0.46)
